

PROFESSIONAL MULTI-SURFACE CLEANER

Neutralizes Bacteria & Viruses
100% Biodegradable

Kills Odors, No Bleach Added
Ready to Use, No Rinse Formula

ZGuard™ antimicrobial and surface cleaner kills germs including bacteria, viruses, and fungi that can travel through the air or linger on surfaces. ZGuard™ ingredients have undergone 14 years of extensive testing. **Tests have shown ZGuard™ kills SARS, human and canine coronaviruses, a variety of influenzas, hepatitis B and C, and herpes simplex 1, among others.** Z-Guard is not only a powerful cleaner but a potent treatment that destroys those germs, so they no longer live in the air you breathe or on the surfaces you touch.

ZGuard™ is the perfect solution for both personal and professional use. While it's harsh on germs, it's not harsh on anything else. You can use it to clean even the most sensitive surfaces, materials, and equipment. In addition to hard surfaces, ZGuard™ is completely safe to use on porous surfaces like upholstery and clothing where it not only cleans but gets out pungent odors. Its water-based, non-hazardous, environmentally friendly formula contains no synthetic surfactants and is completely bio-degradable.

Because it's a no rinse formula ZGuard™ is very simple to use. With it, you can clean and/or treat the surface in one easy, effective step using standard, touchless cleaning protocols.

A SAFE & EFFECTIVE SOLUTION

ZGuard™ ingredients are considered Generally Recognized As Safe (GRAS) by the FDA under sections 201(s) and 409 of the US Federal Food, Drug, and Cosmetic Act. ZGuard™ is so safe its ingredients are US EPA exempt from registration under the minimal risk pesticide FIFRA section 25(b). In addition, ZGuard™ is classified as a Non-Irritant according to OSHA, US D.O.T. and the Canadian Transportation of Dangerous Goods Act testing protocols and thus requires no PPE's as per 29CFR.
